Upwise

Strong foundations in maths and English — built session by session.

Jesse, Founder · April 2026 · upwise.com.au

In a class of 28, your child doesn't stand a chance of being seen.

42%

of Australian schools teach with a qualified teacher shortage — up from 14% in 2018.

82%

of primary teachers say their job damages their mental health.

1 in 3

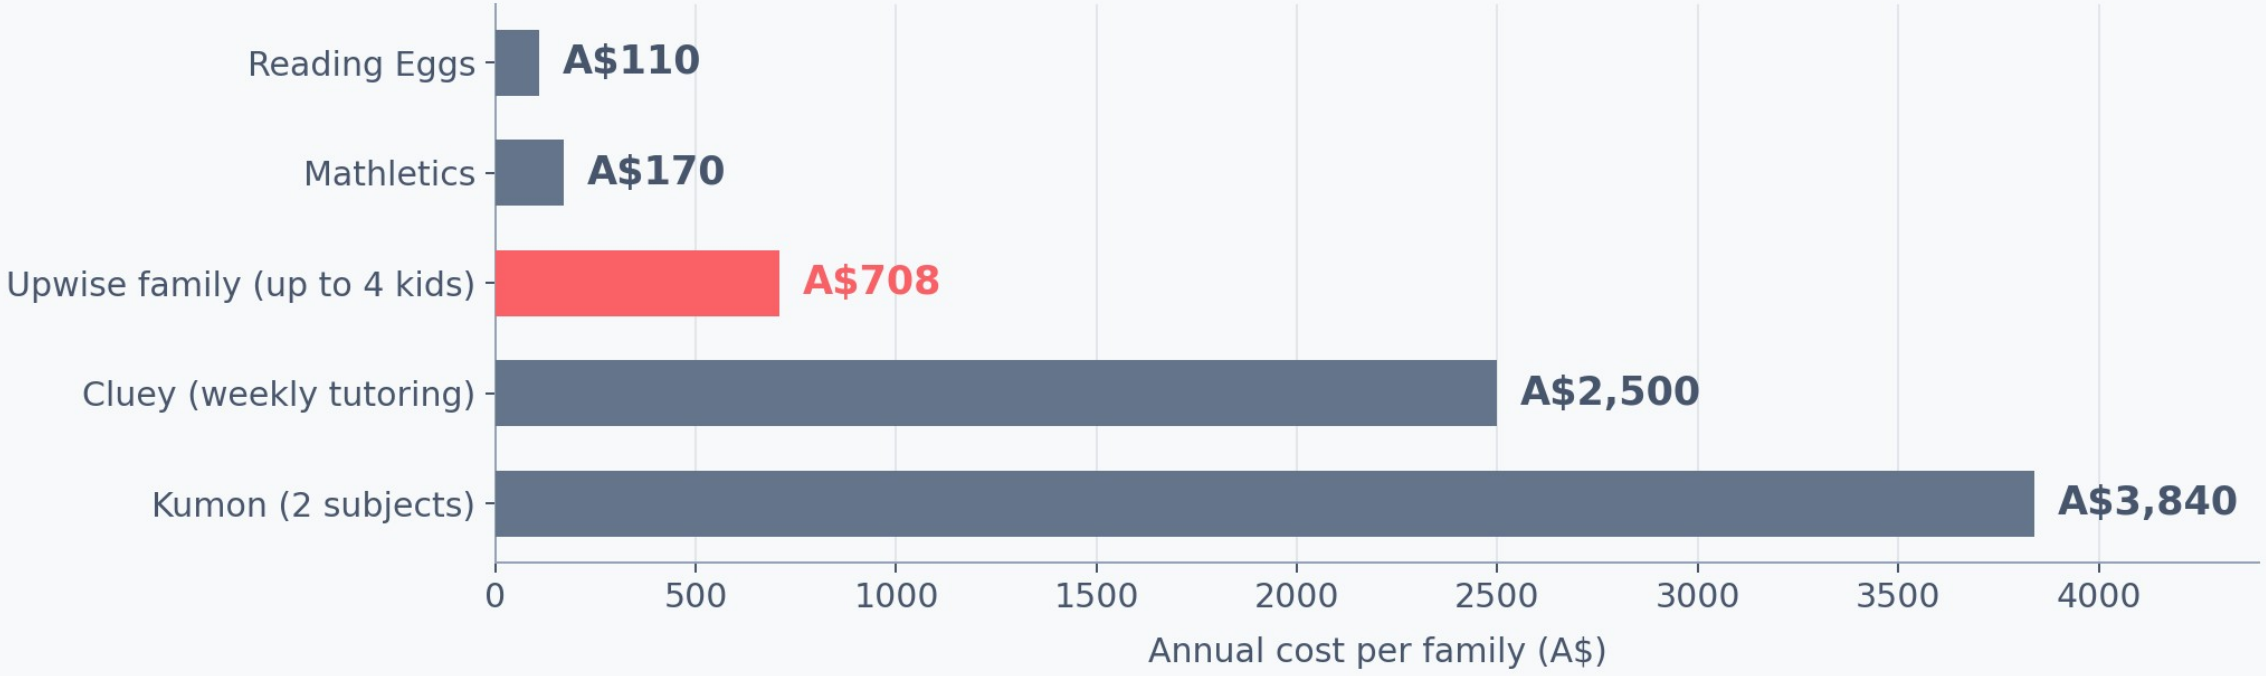
Year 3 students sit below literacy proficiency.

Even Victoria's A$1.2 billion catch-up tutoring program "*did not significantly improve outcomes*" — Victorian Auditor-General, 2024.

The problem isn't money. It's the delivery model.

A$2.2 billion is already leaving Australian parents' wallets.

Annual cost per family across Australian supplemental learning:



35% of Australian parents already pay for tutoring. 18% spend A$100–150 per week.

Our job is redirection, not creation.

The 2-sigma solution, finally economical.

Three forces converging, for the first time in history.

1

The science is 40 years old.

Benjamin Bloom (1984) proved 1:1 mastery tutoring produces +2.0 standard deviations of improvement — the 98th percentile of classroom-taught peers.

2

The economics just flipped.

LLM inference costs fell 150–1000× in five years. Personalised adaptive tutoring just became viable at a consumer subscription price.

3

Parents are ready.

Post-COVID, Australian parents normalised digital-first learning for their children — and are actively looking for tools that work.

What Bloom called the "2-sigma problem" — the known solution that couldn't scale — is no longer a problem.

A mastery-based learning coach for every Australian child.

For the price of a family streaming subscription.

1

Diagnose

A short adaptive assessment pinpoints exactly where the gaps are.

2

Learn

20-minute daily sessions adapt in real time — questions stay in the 80% win-rate zone.

3

Master

Skills only lock in after proven mastery across multiple sessions. Spaced repetition holds them.

Free 7-day trial · A$39/mo single child · A$59/mo family (up to 4 kids) · ACARA-aligned

The parent is the guide. We give them the map.

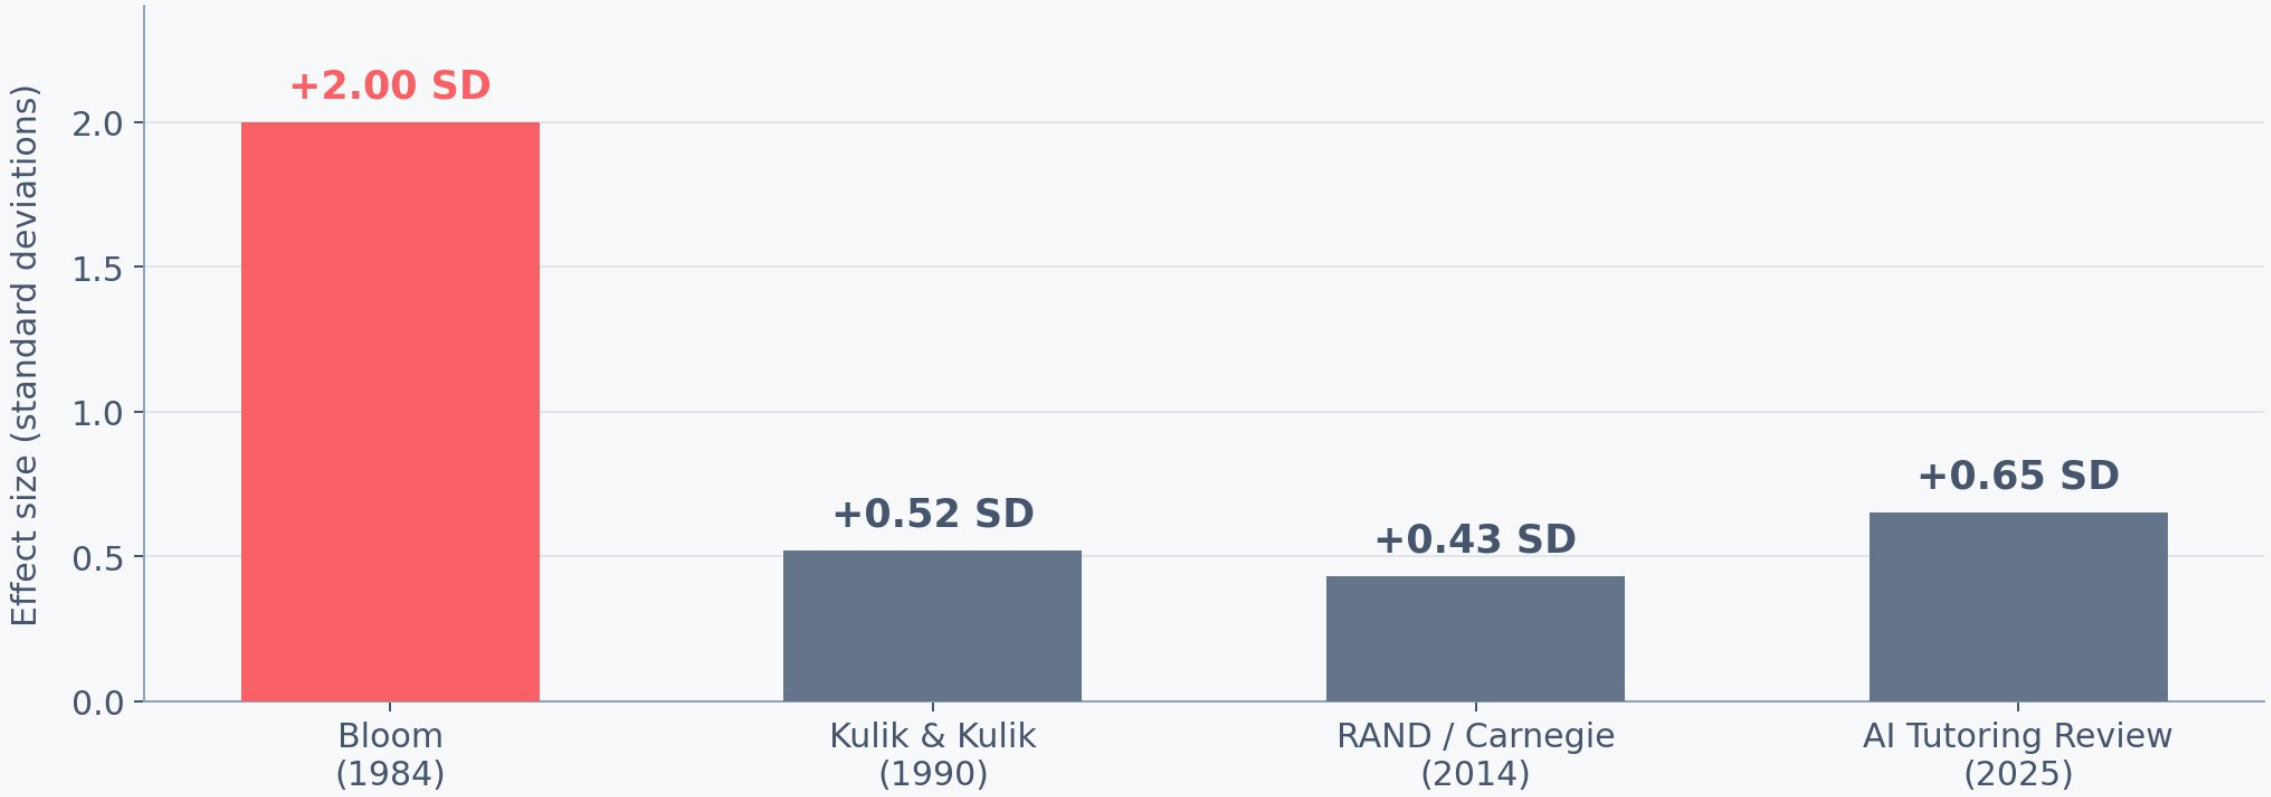
Research consistently shows AI tutoring works best when paired with a human guide.

- **Daily briefing** — Before each session — what your child's working on, what to watch for.
- **Real-time nudges** — When they get stuck — with the exact wording you can use.
- **Weekly reports** — Clear enough to share with their classroom teacher.
- **Conversation scripts** — What to say at dinner to reinforce what they just learned.

"No teaching degree required."

Every parent gets the tools. No extra hours. No curriculum expertise needed.

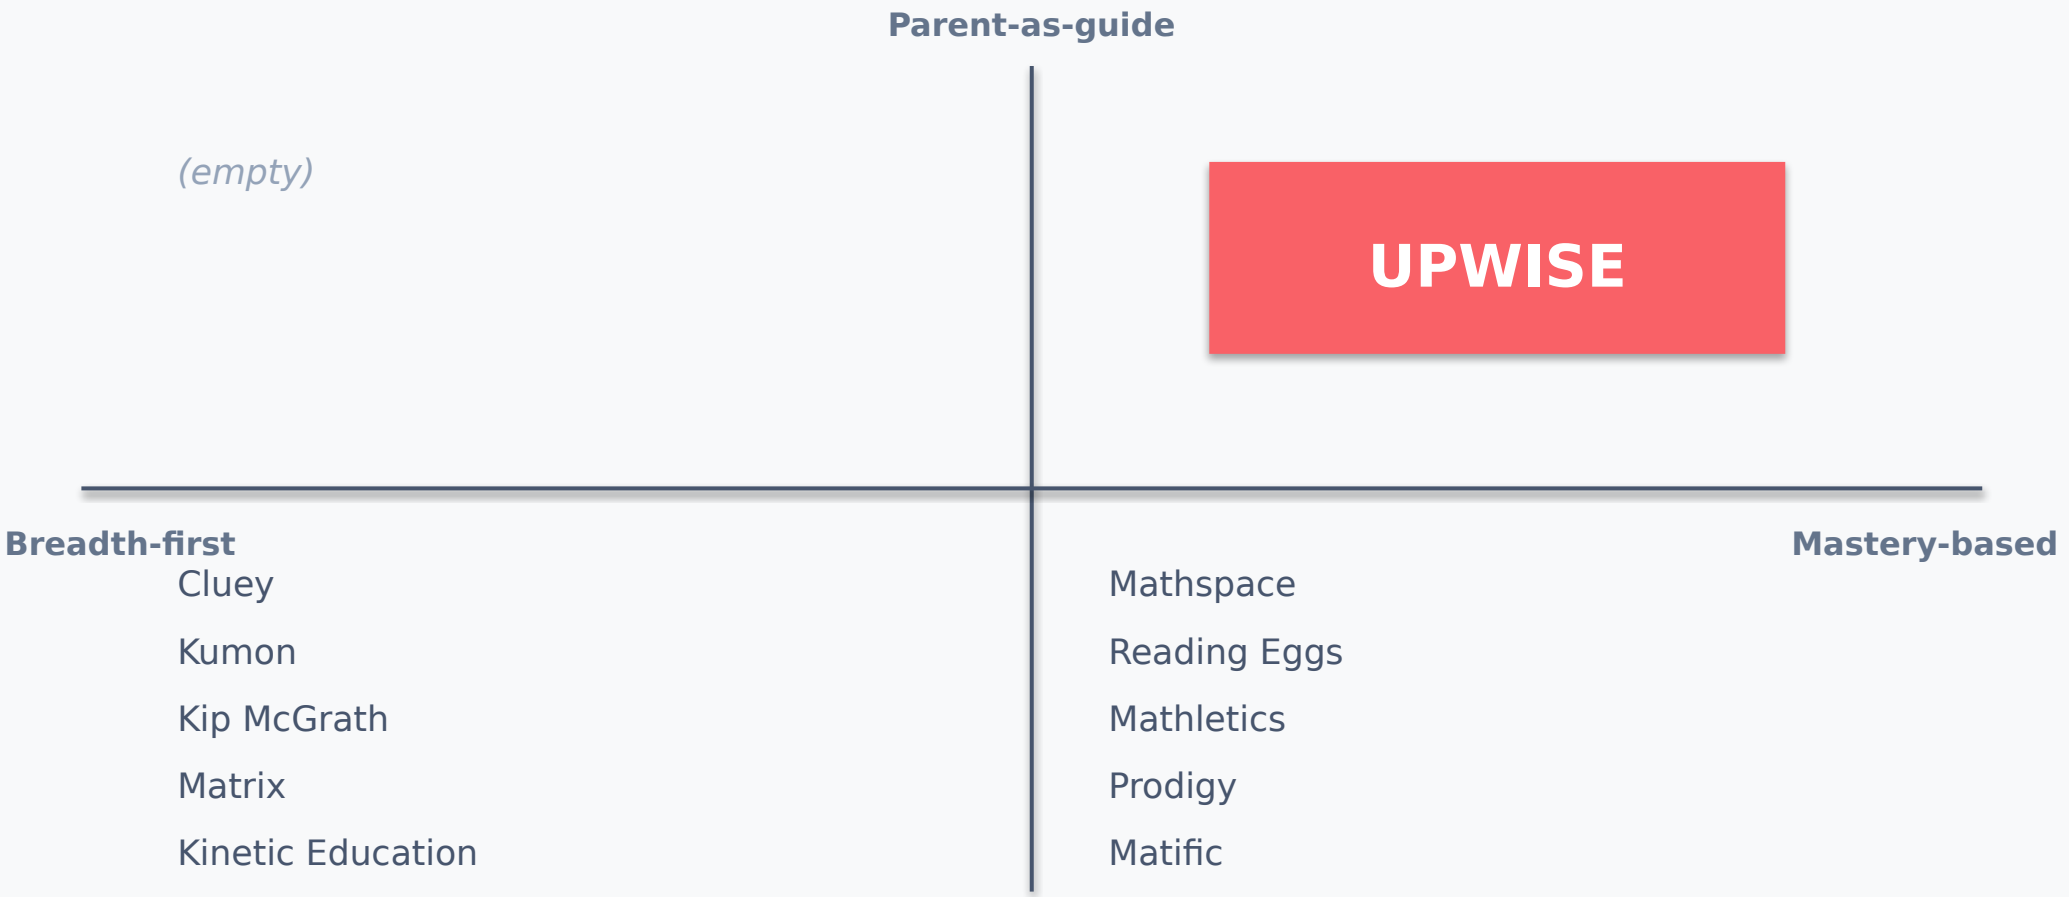
This isn't experimental. It's proven. Four times over.



Upwise is the first Australian operationalisation of 40 years of validated learning science.

Sources: Bloom (1984) · Kulik & Kulik (1990) · Pane et al. / RAND (2014) · 2025 AI tutoring systematic review (48 studies).

No Australian product owns mastery + parent-as-guide.



Cluey FY25: revenue down 15% to A$25.6M, net loss A$5.5M · Kumon: A$3,840/yr per child for maths + English

17,000 families = A$10M ARR.

Not a moonshot. Arithmetic.

1.1%

of Australia's 1.52 million primary-aged households.

Or 4.5% of the 380,000 already paying for supplemental learning.

PATH TO A$10M ARR

~17,100 active families	at A$39–59/mo blend
Software gross margin	75–80% (LLM cost falling)
Avg customer lifetime	~18 months (assumption)

AU COMPARABLES

3P Learning (Mathletics):	A$110M rev, software margins ✓
Mathspace:	profitable, bootstrapped ✓
Cluey (1:1 human):	A$25.6M rev, A$5.5M loss ✗

Cluey's loss isn't evidence AU edtech is broken. It's evidence that 1:1 human tutoring is.

Safe AI. Australian-built. Parent-visible.

Every parent's first question about AI, answered in the product itself.

Closed system

No open chat. No user content. Curriculum-constrained.

20 min bounded

Less screen time than YouTube. Designed to end on a win.

Parent-visible

Every session observable. Nothing hidden.

Australian-owned

AU data, AU servers. Techne AI Pty Ltd.

eSafety-aligned

Designed to Australian eSafety Commissioner guidance.

No ads. No third-party tracking. No data sharing. Ever.

Traction.

Replace with actual numbers before pitching. Angels reward precision over puffery.
